Roberto Monforte (Head Winemaker in Bodega Cooperativa San Miguel de Ausejo), Gorka Etxebarria (Head Winemaker in Bodegas Burgo Viejo en Alfaro) y Juan Antonio Blanco (Vineyards consultant, Doctor in Viticulture y Enology in the University of La Rioja).

*. **DETALLES DE LA COSECHA/VINTAGE DETAILS:**

2020 was marked by an early budspout and a quick and long growing of the canopy due to generous rains and higher temperatures than usual during the Spring and the beginning of the Summer. In general in the Appellation DOCa Rioja it was a complicated year with an excess of vigour and Mildew. We controlled successfully this in our vineyards because they are located in places with an excellent exposition to the wind and sun on soils with high capacity of drainage. August and the first 15 days of September were dry and warm but there was a change in the weather the second 15 days of September with a strong decrease of the temperatures and North-west wind that helped to have a complete maturation.

*. **% DE ALCOHOL/ALCOHOL LEVEL:** 12°.

*. **% VARIEDADES UTILIZADAS/BLEND OF GRAPE VARIETIES:**
Viura 85% y Sauvignon Blanc 15%.

*. **ENVEJECIMIENTO Y TIPO DE BARRICA/ TYPE OF OAK AND % OF NEW WOOD AND SIZE OF BARRELS:** 7 months in two new French oak barriques of 225 l, a new American oak barrique of 225 l and an small stainless steel tank of 100 l. After those 7 months all the wines were racked into a 750 tank.

***. DATOS DEL VIÑEDO (EDAD DE LA VID, TIPO DE SUELO, NOMBRE DE PARCELA RELACIONADA)/VINEYARD DETAILS (AGE OF VINES, SOIL TYPE, PARCEL NAMES IF APPLICABLE)**

Valderrete

- Planted in 1975
- Ausejo. Rioja Oriental
- 0,35 hectáreas
- Height: 560 m over the sea level.
- Gobelet with 6 spurs. Variety Viura.

La Ontana

- Planted in 2014
- Villamediana de Iregua. Rioja Oriental
- 1,2 hectáreas
- Height: 480 m over the sea level.
- Espalier with 6 spurs. Variety: Sauvignon Blanc.

These are not our own vineyards but the viticultor is assesed in all the management of the vineyard by us.

Both vineyards are located on an alluvial, sand and gravel soil with a low retention of water.

***. DATOS DE ELABORACIÓN/WINEMAKING DETAILS:** on 22th September both varieties were harvested in cages of 8 kilos. Bunch sorting in the vineyards, Soft pressing in a vertical press with whole bunch. Low pressing yield -approx. 50%-. Static settle. The sine begins the fermentation in a stainless steel and when the density arrives to 1,040 we put the wine into 2 French oak barriques and 1 aAmerican oak barrique -all of the new-. The wine remains 7 months with batonnage every week. After those 7 months all the wines were racked into a 750 tank.

All the movements of the wine are manual using the gravity, no pumps were used in any moment of the process.

On 9th September 2021 1,027 were filled.
